## IP COMMUNICATION

Intelligent and advanced, IP technology takes video door entry systems beyond their traditional limits: increased performance - whatever the building size - with contemporary, multiple audio/video communication between indoor stations and entrance panels with guaranteed, protected signal quality and a potentially infinite number of users. Expansion is as easy and simple as initial installation, using the existing LAN networks, without having to lay dedicated cabling for efficient and high-performance communication.

## IP INTERCOM

Vismart is the digital entry panel with IP protocol opening the door to IP 7" Outdoor, digital system that takes the concept of video door phone systems to the next level. The unmistakable Vismart style features polished finish, top quality materials, smooth, stylish design lines. Countless functions are presented on an aesthetically pleasing 7" lcd display.
